- ▶ Easy administration tools

Technology Complex yet Simple

TDNet Discover's advanced technology supports high-capability indexing, search, and management of organizational information resources. At the same time, it recognizes the importance of the users' experience and the intuitive and clean environment they need. Our unique technology offers:

- ▶ Out of the box unique and fully customizable portal and content pages with a comprehensive content-management system
- ▶ Interoperability with organizational infrastructures
- ▶ Integration of biomedical information resources into a single work environment
- ▶ Efficient information deployment - search - browse - link - deliver
- ▶ Advanced crawling, indexing and querying capabilities
- ▶ Integration with third-party systems and continuous processes
- ▶ Consortia, multisite, group support
- ▶ Compatibility with mobile devices
- ▶ API support
- ▶ Built-in SUSHI statistics harvester

Content Everything You're Searching for

TDNet Web-Scale Search is the most comprehensive solution for biomedical libraries and information centers. It supports multiple sites with different content, which is easily displayed and accessible based on user authorizations.

- The content TDNet Discover can find is comprehensive and varied, and includes:
- ▶ Prepopulated indexed content in the TDNet repository
 - ▶ Indexed customer proprietary content in the TDNet repository
 - ▶ External content crawled and indexed by TDNet
 - ▶ Real-time querying of unindexed content
 - ▶ Comprehensive knowledgebase
 - ▶ Easily displayed and accessible content based on user authorizations
 - ▶ Support of multiple sites with different content

Service Customization, Implementation and Adaptation

The expert services that are an integral part of TDNet Discover include close monitoring throughout the entire process, from definition of the requirements to full implementation and adaptation according to the needs of the organization:

- ▶ Integration with organizational and external systems, definition of user profiles, customization of the user interface, and more
- ▶ Additional activities surrounding retrieved data - ordering articles from a third-party provider, exporting citations to a bibliography-management system, setting up alerts by personalized profiles, and more

We uniquely adapt our interface to your organization in terms of both design and definition of the data items and data flow that will be displayed. We also customize it to the particular way your company may be consuming content.

Why TDNet?

- ▶ on the scope of service you need - Standard, Professional and Ultimate.
- ▶ We provide you with a technology and service response that includes an advanced software product adapted to your organization's needs in terms of design, interfaces and content characteristics
- ▶ We are flexible in understanding your business requirements and in adapting our technological solution to them
- ▶ We put at your disposal expert personnel that will fine-tune our solution to suit your needs
- ▶ We assess the future needs of your organization and supply a modular and flexible product that can be further developed
